Summary

Highly motivated third-year Computer Science student with a strong background in data analysis, machine learning, and software development seeking a RevOps Analyst role. Proven ability to conduct comprehensive market research, analyze data, and develop actionable insights. Eager to leverage technical skills and analytical abilities to contribute to a dynamic team and drive business growth.

Technical Skills

- **Languages:** Python, C, C++, Java, PostgreSQL
- **Machine Learning/Data Analysis:** TensorFlow, PyTorch, Pandas, NumPy, Scikit-learn
- **Web Development:** HTML, Flask, API Integration
- **Tools:** Git, Linux, Data Annotation Tools (Python), Excel, PowerPoint, CRM Tools (Proficient)

Professional Experience

Data Annotator SAIPS (Ford Motor Co.), Tel Aviv, Israel
December 2021 October 2022

- Developed and utilized Python-based data annotation tools to support the training of neural network models for autonomous vehicle systems.
- Collaborated with developers to ensure data quality and consistency in machine learning applications.
- Gained hands-on experience with Python, data preprocessing, and machine learning methodologies.

HR Officer (Captain) Israel Defense Forces (IDF)
July 2018 May 2021

- Led the HR department for a 500-personnel unit, managing HR planning, data management, and administrative tasks.
- Supervised a team of 12, developing leadership, teamwork, and organizational skills in a high-pressure environment.

Projects

Resume Tailoring Website with Gemini API
Developed a website utilizing the Gemini API to tailor resumes to specific job descriptions.

- Built a website using HTML, Flask, Python, and API integration.
- Enabled users to upload resumes and receive customized resumes optimized for target roles.

Education

B.Sc. in Computer Science The Hebrew University of Jerusalem
Expected Graduation: 2026

Relevant Coursework

Algorithms, Data Structures, Operating Systems, Databases, Object-Oriented Programming (OOP), Network Systems, Software Engineering, Introduction to Natural Language Processing, Machine Learning Methods, Introduction to Machine Learning.
