- **Languages:** Python, C, C++, Java, SQL, PostgreSQL
- **Data Analysis/ML:** TensorFlow, PyTorch, Pandas, NumPy, Scikit-learn
- **Web Development:** HTML, Flask, API Integration
- **Tools:** Git, Linux, Data Annotation Tools (Python), Excel, PowerPoint

Professional Experience

Data Annotator

SAIPS (Ford Motor Company), Tel Aviv

December 2021 – October 2022

- Developed Python-based data annotation tools, significantly improving efficiency of neural network model training for autonomous vehicle systems.
- Collaborated with developers to ensure high data quality for machine learning applications.
- Gained hands-on experience with data processing, annotation, and practical application of machine learning techniques.

HR Officer (Captain)

Israel Defense Forces (IDF)

July 2018 – May 2021

- Managed the HR department for a 500-personnel unit, overseeing planning, data management, and administrative tasks.
- Supervised a team of 12, developing leadership and teamwork skills in a fast-paced environment.

Projects

Resume Tailoring Website with Gemini API

Developed a website using Gemini API to tailor resumes to specific job descriptions. Optimized resume content for enhanced relevance to target roles. Utilized HTML, Flask, Python, and API integration.

Education

B.Sc. in Computer Science

The Hebrew University of Jerusalem

Expected Graduation: 2026
