## Summary

---

Highly motivated and analytical Computer Science student seeking a part-time RevOps Analyst position at ThetaRay. Possessing strong research, data analysis, and project management skills, combined with experience in data processing and tool development. Eager to contribute to ThetaRay's mission of enhancing trust in financial transactions.

## Technical Skills

---

- **Languages:** Python, C, C++, Java, PostgreSQL, SQL
- **Libraries:** TensorFlow, PyTorch, Pandas, NumPy
- **Tools:** Git, Linux, Data Annotation Tools (Python), Excel, PowerPoint
- **Web Development:** HTML, Flask, API Integration

## Professional Experience

---

### Data Annotator

SAIPS (A Ford Motor Company Subsidiary), Tel Aviv, Israel

*Dec 2021 – Oct 2022*

- Developed and utilized Python-based data annotation tools, improving data quality and efficiency for training neural network models.
- Collaborated with developers to refine annotation processes, contributing to the development of autonomous vehicle systems. Gained practical experience in data processing and analysis within a research and development setting.

### HR Officer (Captain)

Israel Defense Forces (IDF)

*Jul 2018 – May 2021*

- Led the HR department for a 500-personnel unit, responsible for HR planning, data management, and administrative tasks. Demonstrated strong organizational skills and attention to detail.
- Supervised a team of 12, honing leadership, teamwork, and project management skills in a fast-paced, high-responsibility environment.

## Education

---

### B.Sc. in Computer Science

The Hebrew University of Jerusalem

*Expected Graduation: 2026*

## Projects

---

### Resume Tailoring Website with Gemini API

Developed a website using HTML, Flask, Python, and API integration to tailor resumes to specific job descriptions, demonstrating practical application of web development and API integration skills.
